Experience

Hookfish.in

July 2023 – Present

Frontend and React-Native developer

Mumbai, Maharashtra

- Enhanced PHP-Laravel website by implementing a role-based model, resolving bugs, and refining access controls for a smoother user experience.
- Optimized performance and introduced a new feature in our React Native broker app, elevating UI standards for seamless user interactions.
- Improved React Native app with a dynamic map view centered on user location and integrated a robust roles and permissions modal for enhanced security and streamlined access management.
- Boosted performance in a complex React app through memoization and code splitting, reducing load times and enhancing user interactions.
- Implemented lazy loading and code splitting in a React dashboard app, optimizing initial loading and improving performance by loading components based on user interactions.

Hookfish.in

April 2023 – June 2023

Front End Developer In1tern

Mumbai, Maharashtra

- I modernized the admin panel's architecture by migrating from PHP to ReactJS, introducing streamlined pagination and robust search features, all while elevating the overall user experience with a sleek, intuitive interface.
- I delved into React Native, crafting HookFish, a seller app, from the ground up.
- Ensured reliability by conducting end-to-end testing using Cypress for a React application, validating the entire user journey for stability.

Projects

Shoe Shop Ecommerce | HTML, CSS, JavaScript, ReactJs, MongoDB, ExpressJs, NodeJs

May 2022

- Shoeshop is an e-commerce website built using the MERN stack, which consists of MongoDB, Express, React, and Node.js.
- It has both a client panel and an admin panel, allowing for efficient management of the site's inventory and orders. The panels have CRUD (Create, Read, Update, Delete) functionality, enabling easy updating and management of the website's products and orders.
- Additionally, Shoeshop has integrated with a third-party payment gateway, specifically Paypal, allowing for secure and seamless transactions.

FastBlogg | HTML, CSS, JavaScript, ReactJs, MySQL, ExpressJs, NodeJs, TailwindCSS

October 2022

- FastBlogg-MERN is a web application that allows users to create, read, update, and delete blog posts.
- It is built using the MERN stack, which includes MySQL, Express, React, and Node.js.
- The client-side of the application has CRUD functionality, allowing users to interact with the blog posts through a user-friendly interface. The application fetches the data from the backend, which is stored in a MySQL database.

AI Image Generator | ReactJs, MongoDB, ExpressJs, NodeJs, Cloudinary

October 2022

- The AI-Image-Generator is a web application built using the MERN stack that utilizes the DALL-E API to generate unique and creative images.
- The application allows users to input textual descriptions or prompts, which are then processed by the DALL-E API to create a corresponding image.

Technical Skills

Languages: HTML/CSS, JavaScript, Python, Rust, SQL,

Developer Tools: VS Code, Google Cloud Platform, Android Studio

Technologies/Frameworks: ReactJs, NodeJs, TailwindCSS, Bootstrap, Redux, NextJs, Linux, GitHub, WordPress, Cloudinary, AWS
